

1.
 - a. I've completed 1.1p, 1.2p, 1.3p, 2.1p, 2.2p, 2.3c, 3.1p, 3.2c and it's marked as completed, and currently I don't have any overdue tasks. There are a few more which I need to complete within this week.
 - b. As mentioned in my previous learning plan 1.1p, most the methods and strategies worked very well, to be more specific, self-study, practicing problems and taking short notes helped me very well and went according to the plan.
 - c. Time management was a challenging one in this module. Especially when I have to study the lecture notes, watch videos related to the module and at the same time I have to complete the assignments on time without having an overdue. This didn't go exactly as planned. My plan was to allocate 25 hours per week to study this module outside lecture hours, but I had to use up some time I allocated for this module to study the other modules I'm following.
 - d. I'm planning to allocate more time for this module. Increment it by 30 hours per week which should be enough to handle the study load and assignments. I need to practice more questions and writing HDL codes to improve my skills and knowledge in this module.
 - e. The upcoming assignments with tight due dates might stress me out which will impact me negatively in studies. Not only tight due dates but external factors such as transportation problems, technology failures, health issues and sometimes unforeseen events such as natural disasters and electricity disconnection might also affect me negatively.
 - f. So, to mitigate these risks I plan to put up a detailed study schedule for the upcoming weeks and exploring alternative study location to relax my mind and avoid any disruptions. As mentioned, before I will be incrementing the time allocated per week to study this module which will help me a lot, even if it takes me to stay up all night, I will push my boundaries and come out of my comfort zone if needed.
2. Yes, the time allocated per week for this module needs to be updated from 25 hours to 30 hours per week. But I keep the days allocated for that as same as before, which are Wednesdays, Fridays, Saturdays, and Sundays, as these are generally more ideal to focused study according to me.
