

Formulate the relevant Boolean expression, in **Canonical Form** for the truth table given below. Do not simplify the expression. Show all steps

| P | Q | R | $f(P, Q, R)$ |
|---|---|---|--------------|
| 0 | 0 | 0 | 1 |
| 0 | 0 | 1 | 0 |
| 0 | 1 | 0 | 1 |
| 0 | 1 | 1 | 0 |
| 1 | 0 | 0 | 1 |
| 1 | 0 | 1 | 0 |
| 1 | 1 | 0 | 0 |
| 1 | 1 | 1 | 1 |

Rows where $f(P, Q, R) = 1$:

- Row 1: $P=0, Q=0, R=0 \Rightarrow P', Q', R'$ because P, Q, R are all equal to 0.
- Row 3: $P=0, Q=1, R=0 \Rightarrow P', Q, R'$ because P, R are equal to 0 and Q is equal to 1.
- Row 5: $P=1, Q=0, R=0 \Rightarrow P, Q', R'$ because Q, R are equal to 0 and P is equal to 1.
- Row 8: $P=1, Q=1, R=1 \Rightarrow P, Q, R$ because P, Q, R are all equal to 1.

Boolean expression in Canonical Form:

$$(P' \cdot Q' \cdot R') + (P' \cdot Q \cdot R') + (P \cdot Q' \cdot R') + (P \cdot Q \cdot R)$$
