

## Learning Plan for SIT111

### Target Grade:

- High Distinction

### Study Time:

- I plan to dedicate at least 25 hours per week outside of scheduled learning sessions for SIT111. I aim to distribute this time across weekdays and weekends, with a focus on Wednesdays, Fridays, Saturdays, and Sundays, as these are generally more ideal to focused study according to me.

### Strategies/Methods:

- **Self-study** – I will thoroughly go through the study materials and videos provided by the university to understand the chapters one by one clearly before moving on to the next chapter.
- **Discussion with peers** – regular discussions with my peers will help me enhance my understanding about the contents in the subject from their point of view.
- **Reading online articles, text books, Videos** – supplementing the provided study materials with additional reading and learning from YouTube videos, online books and articles will deepen my knowledge.
- **Practicing problems** – regular problem-solving exercises will reinforce theoretical knowledge and improve problem-solving skills.
- **Taking short notes** – summarizing key concepts in concise notes will aid in quick revision.

### Challenges:

- **Complexity of concepts** – in order to overcome the complex concepts and contents in this module, I've planned to break down topics into smaller, more manageable parts and seek clarification from the lecturer or peers.
- **Time management** – balancing study with other commitments might be challenging. I will create a weekly schedule to ensure a consistent study routine and prioritize task efficiently.
